Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Background

E.O. 14161, "Protecting the United States from Foreign Terrorists and Other National Security and Public Safety Threats," directs implementation of uniform vetting standards and necessitates the collection of all information necessary for a rigorous vetting and screening of all grounds of inadmissibility and removability or bases for the denial of immigration-related benefits. See 90 FR 8451 (Jan. 20, 2025). Implementation of the directives provided in the E.O. requires U.S. Citizenship and Immigration Services (USCIS) to collect standard data on immigration forms and/or information collection systems. This data will be collected from certain populations of individuals on applications for immigration-related benefits and is necessary for the enhanced identity verification, vetting, and national security screening and inspection conducted by USCIS and required under the E.O.

This collection of information is necessary to comply with section 2 of the E.O. to establish screening and

vetting standards and procedures to enable USCIS to assess an alien's eligibility to receive an immigration-related benefit from USCIS. This data collection is also used to validate an applicant's identity and to help determine whether such grant of a benefit poses a security or public-safety threat to the United States.

USCIS will collect biographic information on immigration information collection instruments and systems. USCIS will update its forms and systems to collect additional information from individuals who seek admissibility or other benefits when that information is not already collected.

New Information To Be Collected

U.S. Government departments and agencies involved in screening and vetting, to include USCIS, identified 24 data elements that would constitute a new baseline threshold of data to be collected for improved identity verification and national security vetting. These 24 core data elements were published in the **Federal Register** at 90 FR 11054 on March 3, 2025, for a 60-Day notice and at 90 FR 42604 on September 3, 2025, for a 30-Day notice. These six (6) new data elements are in addition to and separate from the data elements for which USCIS requested comments in the March 3, 2025, and September 3, 2025, generic clearance notice, but they are also needed for further identification and national security vetting and will be added to certain immigration benefit request forms where the information is not already collected.

The following six (6) data elements are biographic and employment identifiers used to help USCIS confirm both an individual's identity as it relates to the submitted application and to other records. These biographic identifiers are also used by USCIS and screening partners to help confirm or disprove a relevant association between an applicant and information of interest and the strength of that association in the context of the underlying information.

Applicant information is collected to maintain a record of persons applying for specific immigration benefits, and to help determine whether these applicants are eligible to receive the benefits for which they are applying. The information provided through USCIS forms is also analyzed—along with other information that the Secretary of Homeland Security determines is necessary, including information about other persons included on the USCIS forms—against various security and law enforcement databases to identify those applicants who may pose a security or public-safety risk to the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), invite review and comment from the public and local, State, Tribal, and Federal agencies on applications we have received for permits to conduct certain activities with endangered and threatened species under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. Documents and other information submitted with the applications are available for review,

subject to the requirements of the Privacy Act of 1974, as amended (5 U.S.C. 552a), and the Freedom of Information Act (5 U.S.C. 552).

Background

With some exceptions, the ESA prohibits take of listed species unless a Federal permit is issued that authorizes such take. The definition of “take” in the ESA includes hunting, shooting, harming, wounding, or killing, and also such activities as pursuing, harassing, trapping, capturing, or collecting, or attempting to engage in any such conduct.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to take endangered or threatened species while engaging in activities that are conducted for scientific purposes that promote recovery of species or for enhancement of propagation or survival of species. These activities often include the capture and collection of species, which would result in prohibited take if a permit were not issued. Our regulations implementing section 10(a)(1)(A) of the ESA for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies, and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies. Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild.
